JOURNAL OF FLUID MECHANICS

INDEX OF AUTHORS OF PAPERS

&

INDEX OF BOOKS REVIEWED

IN VOLUMES 241 to 260

August 1992 – February 1994

CAMBRIDGE
UNIVERSITY PRESS

The JOURNAL OF FLUID MECHANICS exists for the publication of theoretical and experimental investigations of all aspects of the mechanics of fluids.

EDITOR **Prof. G. K. Batchelor**
Department of Applied Mathematics and Theoretical Physics, University of Cambridge, Silver Street, Cambridge CB3 9EW, UK. *FAX* (0)223 337918; *e-mail* karen@amtp.cam.ac.uk

ASSOCIATE EDITORS

Prof. J. F. Brady, Department of Chemical Engineering 210-41, California Institute of Technology, Pasadena, CA 91125, USA. *FAX* (818) 568 8743; *e-mail* jfbrady@caltech.edu

Prof. F. K. Browand, Department of Aerospace Engineering, University of Southern California, PO Box 77187, Los Angeles, CA 90007, USA. *FAX* (213) 740 7774

Prof. D. G. Crighton, DAMTP, University of Cambridge, Silver Street, Cambridge CB3 9EW, UK. *e-mail* dgc16@amtp.cam.ac.uk

Prof. P. E. Dimotakis, Graduate Aeronautical Laboratories 301-46, California Institute of Technology, Pasadena, CA 91125, USA. *FAX* (818) 395 4447

Prof. E. J. Hopfinger, IMG-LEGI, Domaine Universitaire, BP 53X, 38041, Grenoble Cedex, France. *FAX* 76 82 52 71

Prof. J. C. R. Hunt, DAMTP, University of Cambridge, Silver Street, Cambridge CB3 9EW, UK. *e-mail* alice@amtp.cam.ac.uk

Prof. R. Jackson, Department of Chemical Engineering, Princeton University, Princeton, NJ 08544, USA. *FAX* (609) 258 0211

Prof. S. K. Lele, Department of Aeronautics & Astronautics and Mechanical Engineering, Durand Building, Stanford University, Stanford, CA 94305-4036, USA. *FAX* (415) 725 3377; *e-mail* lele@leland.stanford.edu

Prof. J. W. Miles, Institute of Geophysics and Planetary Physics, University of California, San Diego, 9500 Gilman Drive, La Jolla, CA 92093-0225, USA. *FAX* (619) 534 5332; *e-mail* jmiles@ucsd.edu

Prof. T. J. Pedley, Department of Applied Mathematical Studies, University of Leeds, Leeds LS2 9JT, UK. *FAX* (0)532 429925; *e-mail* amt6tjp@uk.ac.leeds.cms1

Prof. D. H. Peregrine, School of Mathematics, University of Bristol, Bristol BS8 1TW, UK. *FAX* (0)272 303316; *e-mail* d.h.peregrine@uk.ac.bristol

Prof. O. M. Phillips, Department of Earth and Planetary Sciences, The Johns Hopkins University, Baltimore, MD 21218, USA. *FAX* (410) 516 7933

Prof. J. S. Turner, Research School of Earth Sciences, The Australian National University, GPO Box 4, Canberra, ACT 2601, Australia. *FAX* (62) 49 0738

Prof. L. van Wijngaarden, University of Twente, Postbus 217, 7500 AE Enschede, The Netherlands. *FAX* 53 35 64 90

Dr M. G. Worster, DAMTP, University of Cambridge, Silver Street, Cambridge CB3 9EW, UK. *e-mail* grae@itg.esc.cam.ac.uk

EDITORIAL ASSISTANT **Dr Linda Drath**

SUBSCRIPTIONS

The *Journal of Fluid Mechanics* (ISSN 0022-1120) is published by the Cambridge University Press in 24 volumes each year. All orders must be accompanied by payment. Single volumes cost £29 net (US $52 in the USA, Canada and Mexico) plus postage. The subscription price (excluding VAT, but including postage) to volumes 258–281, 1994, is £649 (US $1197 in the USA, Canada and Mexico) for institutions: £339 (US $595) for individuals. Copies of the journal for subscribers in the USA, Canada and Mexico are sent by air to New York. EC subscribers (outside the UK) who are not registered for VAT should add VAT at their country's rate. VAT registered subscribers should provide their VAT registration number. Japanese prices for institutions (including ASP delivery) are available from Kinokuniya Company Ltd, P.O. Box 55, Chitose, Tokyo. Second class postage is paid at New York, NY, and at additional mailing offices. Claims for missing issues will be considered only if made immediately upon receipt of the subsequent issue. Copies of back numbers are available from Cambridge University Press. POSTMASTER: send address changes in USA, Canada and Mexico to *Journal of Fluid Mechanics*, Cambridge University Press, 110 Midland Avenue, Port Chester, New York, NY 10573–9864.

COPYING

The *Journal* is registered with the Copyright Clearance Center, 27 Congress St., Salem, Mass. 01970. Organizations in the USA which are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of US copyright law) subject to payment to C.C.C. of the per-copy fee of $5.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0022-1120/93/$5.00+ .00

ISI Tear Sheet Service, 3501 Market Street, Philadelphia, Pennsylvania 19104, USA is authorized to supply single copies of separate articles for private use only.

Organizations authorized by the Copyright Licensing Agency may also copy material subject to the usual conditions.

For all other use of material from the *Journal* permission should be sought from Cambridge or the American Branch of Cambridge University Press.

NOTES FOR AUTHORS

Authors wishing to have papers published in the *Journal* should send them to any editor, choosing one in their own or a neighbouring country where possible. The submission of three copies will expedite assessment, although it may not be possible to return all these copies. Original drawings should not be sent until the paper is accepted. The initial submission will be acknowledged by postcard but not subsequent communications. Submission of a paper implies a declaration by the author that the work is not being considered for publication elsewhere and that it has not already been considered by a different editor of the *Journal*. Reports on conferences must be submitted within three months of the meeting.

Authors are urged to write their papers clearly and attractively, so that their work will be readily accessible to readers. Manuscripts should be typed in double spacing on one side of the paper only, with references listed at the end in alphabetical order of authors. Drawings should be in black Indian ink or from a high-quality laser printer, and should not be larger than 30 cm by 45 cm. Lettering to be inserted by the printer should be shown clearly on copies of the figures, rather than on the original drawings. A typed list of captions should be provided at the end of the manuscript. Extensive detailed mathematical relations, tables or figures likely to be useful only to a few specialists may be held in the editorial files, with copies being made available to readers on request.

Proofs of papers from overseas will usually be despatched to authors by airmail. There is no charge for publication, although the cost of any colour plates (roughly £500 per page) must be borne by authors. An author is entitled to 50 offprints of his paper free of charge, and additional offprints can be purchased if ordered when proofs are returned.

ELECTRONIC SUBMISSION OF PAPERS (IN FINALLY ACCEPTED FORM ONLY)

Papers accepted for publication in the *Journal* can now be printed directly from author-prepared disks based on LaTeX software. A specially designed JFM style macro must be used, and this file (JFM.sty), together with a guide to its use (JFMguide.tex), some sample pages (JFMsampl.tex) and a guide to editorial style and notation (JFMnot.tex) are available as follows:

- Via anonymous ftp from either the Cambridge University Press (cus.cam.ac.uk in the directory/pub/cupress/journals/latex/jfm.all), or the Dept of Applied Mathematics and Theoretical Physics, Cambridge University (ftp.amtp.cam.ac.uk in the directory/JFM).
- On a PC 3.5 in. or Apple Mac disk from the JFM Editorial Office, Dept of Applied Mathematics and Theoretical Physics, Silver Street, Cambridge CB3 9EW, UK.

These files will be updated regularly: please make sure you have the latest version.

When the paper has been accepted for publication (and only then) authors should send the final version on a PC 3.5 in. or Apple Mac disk (not via e-mail) to the Editor or Associate Editor handling the paper, together with an *identical* hard copy and the originals of the figures.

Note that submissions on disks must be suitably prepared, using the JFM LaTeX style file and adhering closely to JFM editorial requirements for notation, English, general style and presentation. Any editorial changes will be made by the printer and if these are numerous it may be more efficient to typeset the paper conventionally from the hard copy.

INDEX OF AUTHORS OF PAPERS

Acrivos, A. *See* Natarajan & Acrivos; Wu, Weinbaum & Acrivos

Acton, E. & Dhanak, M. R.
The motion and stability of a vortex array above a pulsed surface, **247**, 1993, 231–245

Agnon, Y.
On a uniformly valid model for surface wave interaction, **247**, 1993, 589–601

Ahmed, A. *See* Bandyopadhyay & Ahmed

Akylas, T. R. & Grimshaw, R. H. J.
Solitary internal waves with oscillatory tails, **242**, 1992, 279–298

Alam, M. & Arakeri, V. H.
Observations on transition in plane bubble plumes, **254**, 1993, 363–374

Alani, S. *See* DeBlois, Sobey & Alani

Alboussière, T., Garandet, J. P. & Moreau, R.
Buoyancy-driven convection with a uniform magnetic field. Part 1. Asymptotic analysis, **253**, 1993, 545–563

Alemany, A. *See* Lahjomri, Capéran & Alemany

Altobelli, S. A. *See* Givler & Altobelli

Amberg, G. & Homsy, G. M.
Nonlinear analysis of buoyant convection in binary solidification with application to channel formation, **252**, 1993, 79–98

Amberg, G. & Ungarish, M.
Spin-up from rest of a mixture: numerical simulation and asymptotic theory, **246**, 1993, 443–464

Amiet, R. K.
On the second-order solution to the Sears problem for compressible flow, **254**, 1993, 213–228

Anderson, D. M. & Davis, S. H.
Two-fluid viscous flow in a corner, **257**, 1993, 1–31

Anderson, K. G. & Jackson, R.
A comparison of the solutions of some proposed equations of motion of granular materials for fully developed flow down inclined planes, **241**, 1992, 145–168

Andersson, H. I. *See* Kristoffersen & Andersson

Anthony, D. G. & Willmarth, W. W.
Turbulence measurements in a round jet beneath a free surface, **243**, 1992, 699–720

Antonia, R. A. *See* Kim & Antonia; Krogstad, Antonia & Browne; Matsumura & Antonia; Zhou & Antonia

Antonia, R. A. & Mi, J.
Temperature dissipation in a turbulent round jet, **250**, 1993, 531–551

Arakeri, V. H. *See* Alam & Arakeri

Aref, H. *See* Herdtle & Aref

Armi, L. & Williams, R.
The hydraulics of a stratified fluid flowing through a contraction, **251**, 1993, 355–375

Asaeda, T. & Imberger, J.
Structure of bubble plumes in linearly stratified environments, **249**, 1993, 35–57

Ashgriz, N. *See* Mollot, Tsamopoulos, Chen & Ashgriz

Atkins, M. D. *See* Skews, Atkins & Seitz

Aubry, N. *See* Sanghi & Aubry

Auzerais, F. M. *See* Dussan V. & Auzerais

Babchin, A. J. *See* Sawatzky & Babchin

Babiano, A. *See* Elhmaïdi, Provenzale & Babiano

Babić, M.
On the stability of rapid granular flows, **254**, 1993, 127–150

Badulin, S. I. & Shrira, V. I.
On the irreversibility of internal-wave dynamics due to wave trapping by mean flow inhomogeneities. Part 1. Local analysis, **251**, 1993, 21–53

Baesens, C. & MacKay, R. S.
Uniformly travelling water waves from a dynamical systems viewpoint: some insights into bifurcations from Stokes' family, **241**, 1992, 333–347

Baines, W. D., Corriveau, A. F. & Reedman, T. J.
Turbulent fountains in a closed chamber, **255**, 1993, 621–646

Baker, G., Caflisch, R. E. & Siegel, M.
Singularity formation during Rayleigh–Taylor instability, **252**, 1993, 51–78

Balachandar, S., Streett, C. L. & Malik, M. R.
Secondary instability in rotating-disk flow, **242**, 1992, 323–347

Balakumar, P. & Malik, M. R.
Waves produced from a harmonic point source in a supersonic boundary-layer flow, **245**, 1992, 229–247

Balsa, T. F.
Flow generated by a small oscillating cylinder in a mixing layer, **248**, 1993, 237–265

Bandyopadhyay, P. R. & Ahmed, A.
Turbulent boundary layers subjected to multiple curvatures and pressure gradients, **246**, 1993, 503–527

Bara, B., Nandakumar, K. & Masliyah, J. H.
An experimental and numerical study of the

Dean problem: flow development towards two-dimensional multiple solutions, **244**, 1992, 339–376

Barbaro, G. *See* Boccotti, Barbaro & Mannino

Barber, B. C.
On the dispersion relation for trappped internal waves, **252**, 1993, 31–49

Barenblatt, G. I.
Scaling laws for fully developed turbulent shear flows. Part 1. Basic hypotheses and analysis, **248**, 1993, 513–520

Barenblatt, G. I., Bertsch, M., Dal Passo, R., Prostokishin, V. M. & Ughi, M.
A mathematical model of turbulent heat and mass transfer in stably stratified shear flow, **253**, 1993, 341–358

Barenblatt, G. I. & Prostokishin, V. M.
Scaling laws for fully developed turbulent shear flows. Part 2. Processing of experimental data, **248**, 1993, 521–529

Barnett, S. J.
A vertical buoyant jet with high momentum in a long ventilated tunnel, **252**, 1993, 279–300

Barre, S., Quine, C. & Dussauge, J. P.
Compressibility effects on the structure of supersonic mixing layers: experimental results, **259**, 1994, 47–78

Barrett, C. F. *See* Nalpanis, Hunt & Barrett

Basaran, O. A.
Nonlinear oscillations of viscous liquid drops, **241**, 1992, 169–198

Basaran, O. A. & Wohlhuter, F. K.
Effect of nonlinear polarization on shapes and stability of pendant and sessile drops in an electric (magnetic) field, **244**, 1992, 1–1

Bassom, A. P. *See* Rees & Bassom

Bassom, A. P. & Otto, S. R.
Weakly nonlinear stability of viscous vortices in three-dimensional boundary layers, **249**, 1993, 597–618

Batchelor, G. K.
Secondary instability of a gas-fluidized bed, **257**, 1993, 359–371
